PROFILE

AI engineer and full-stack developer building AI chatbots, autonomous agents, RAG applications, and business automation systems, alongside modern web products with React, Next.js, and Node.js. Founder of two AI-focused brands. I help startups and businesses automate repetitive workflows and ship production-grade software.

CORE SKILLS

AI & Automation: OpenAI API, LangChain, RAG pipelines, prompt engineering, AI agents, chatbot development (web & WhatsApp), workflow automation

Frontend: React, Next.js, TypeScript, Tailwind CSS, Framer Motion

Backend & Data: Node.js, Express, REST APIs, MongoDB, PostgreSQL, Stripe integrations

Web3: Solidity, Ethers.js · **Tooling:** Git/GitHub, Vercel, Docker basics

EXPERIENCE & VENTURES

Founder — Neuraloft · AI software & automation studio

- Building AI chatbots, automation systems, and web applications for startups and small businesses.

Founder — Brain Link AI (BLAI) · AI, Web3 & automation solutions

- Brand focused on connecting data, intelligence, and creativity across AI and Web3 products.

Freelance AI & Full-Stack Developer · Upwork / Fiverr · remote

- Delivering chatbots, RAG assistants, automation workflows, and SaaS MVPs for international clients.

SELECTED PROJECTS

- **AI Chatbot Assistant** — GPT-powered business chatbot with custom knowledge-base training and human handoff.
- **PDF Chatbot** — RAG application for conversational Q&A over uploaded documents.
- **WhatsApp Business Bot** — automated support and lead-qualification flows on the WhatsApp platform.
- **AI Automation Dashboard** — workflow automation with monitoring for business operations.
- **SaaS Platform** — subscription web application with authentication and Stripe billing.

CERTIFICATIONS

- Certified AI, Metaverse & Web3.0 Developer — Governor Sindh Initiative (GIAIC)
- Certified Agentic & Robotic AI Engineer — PIAIC (in progress)
